The California Department of Water Resources Report on Capital Outlay Projects Funding Provided from Proposition 1E and 84

Executive Summary

The Disaster Preparedness and Flood Protection Bond Act of 2006 (Proposition 1E) authorizes \$4.09 billion in general obligation bonds to rebuild and repair California's vulnerable flood control structures to protect homes and prevent loss of life from flood-related disasters, and to protect California's drinking water supply system by rebuilding delta levees that are vulnerable to earthquakes and storms. The Safe Drinking Water, Water Quality and Supply, Flood Control, River and Coastal Protection Bond Act of 2006 (Proposition 84) enhances these efforts with an additional \$800 million for flood control projects.

The attached report describes expenditures through December 31, 2009, for capital outlay projects with funding provided from Propositions 1E and 84. The report is required by the 2007 Supplemental Report Budget Act, Item 3860-301-6052.
